Kinetic object called „Enlightenment by PET LEDs“ was created by sculptor Veronika Richterova for the Kmotra pizzeria in spring 2010. This „lantern“ object became directly in this local space, part of her exhibition „From PETroleum lamps to PET LEDs“, included in the art show Designblok 2010.

The artist has been specifically devoted to experimentation and creative work with used PET bottles since 2004. Her often rather large sculptures made of this material represent not only animals and plants, but are also inspired by the dusty beauty of Venetian mirrors, crystal chandeliers and antique furniture.
